CHARITY

A unique game connecting virtual world with the real world, bringing sustainable changes into real life. Focused on improving education and offering children better possibilities for development and at the same time creating new generation of future world leaders.

The GAME is a part of

Manage Your Waste is a circular waste management model suited for developing societies. It has been shaped bearing in mind the burning environmental issues today with a special attention to local conditions.

the line is thin!

Game World

CHALLENGES
Clean the environment, separate waste, recycle, save flora and fauna > deep integration with the real life.

LEARNING
New approach to learning! Play and practice a new language, revise biology, solve a maths problem, code in a new challenge, the possibilities are endless in our game!

LOCATIONS
Play at different locations in our virtual world, help a community clean their neighbourhood, unite with other players to make a difference, join a new project every week.

IMPACT
Play and make an impact in the real world! Numerous projects to choose from. Player sees results and benefits of his/her involvement.

Real World

Local government projects - engage players in environmental actions (with compensation).

Partially localized game development for local workforce engagement (+ our very secret recipe!).

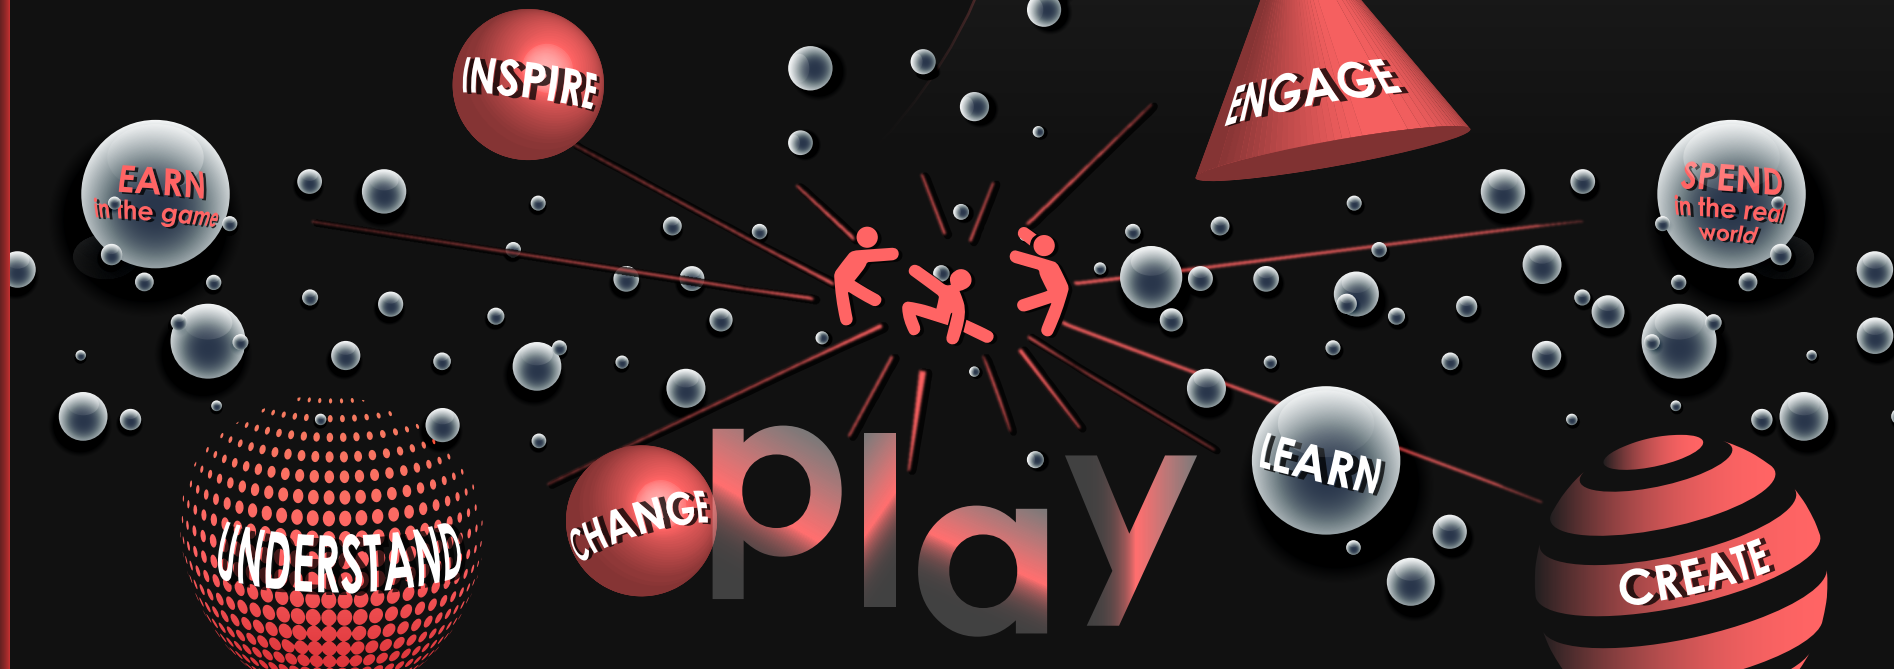

Be a proud sponsor! Discrete advertisements, platform for 'green' companies, socially aware model, new markets development.

A brand new education model! Broadly applicable and revolutionary, with disruptive approach. A breakthrough platform for upcoming ages.

Play and help in a new way: Direct charity - personal and transparent! Teaching, money, sponsorship, donations... - act and show your love!
